TARK 2027: figures regenerated without MTurk

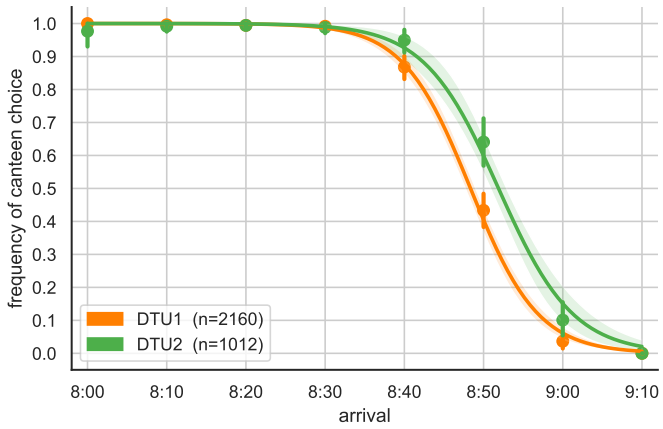

Generated by `scripts/make_figures.py`; numbers in `plots/tark_stats.txt`. Approved main-text set (TSN, 2026-11-09): Fig 6 (diagram + DTU curve), Fig 1 + DIS merged, Fig 3, Fig 7. Rest to appendix. Details: ARGUMENT_MAP.md.

Fig 1: canteen choice by arrival

arXiv (MTurk+DTU)

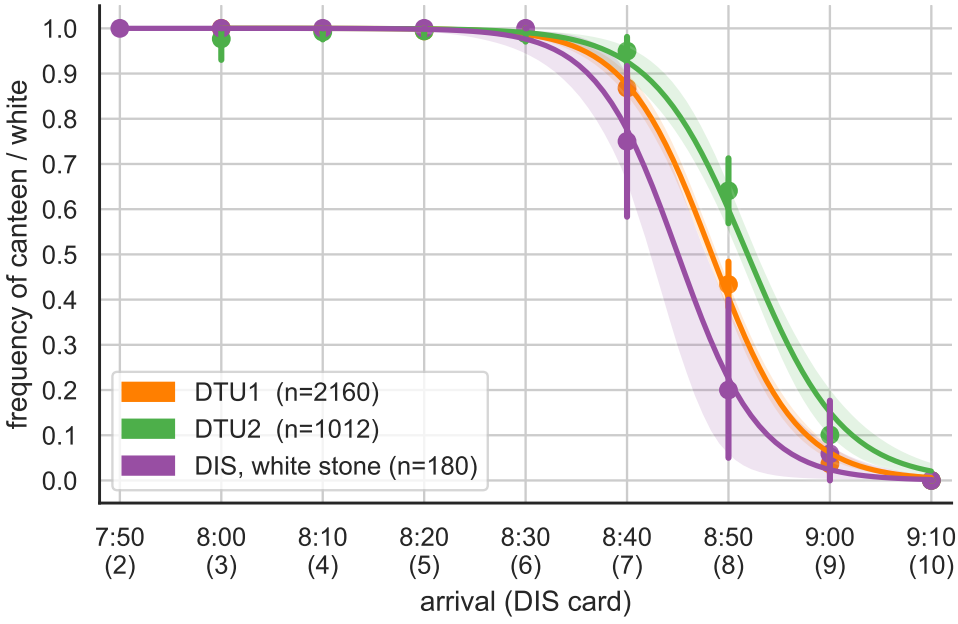

TARK (DTU1+DTU2)

Proposed: merged with DIS (below). 50% point: DTU1 8:48, DTU2 8:52.

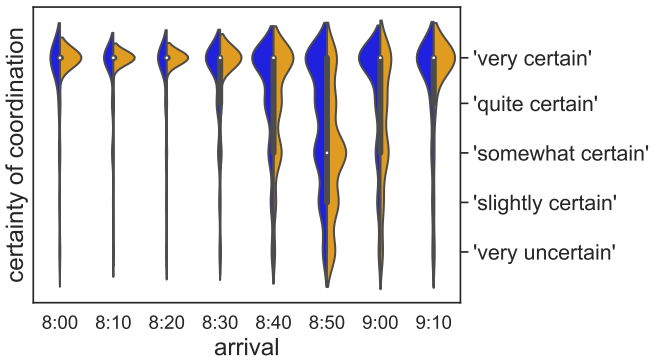

Fig 1 + DIS (proposed, replaces Figs 1 and 5)

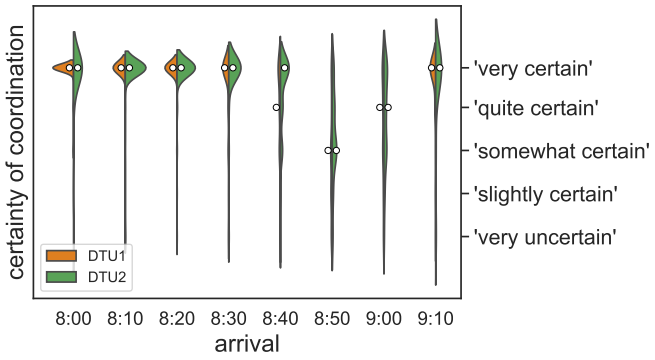

DIS card c mapped to 9:00 + 0:10$(c-9)$. Different payoff (miscoordination loses everything). DIS n=180.

Fig 2: certainty (appendix)

arXiv (MTurk+DTU)

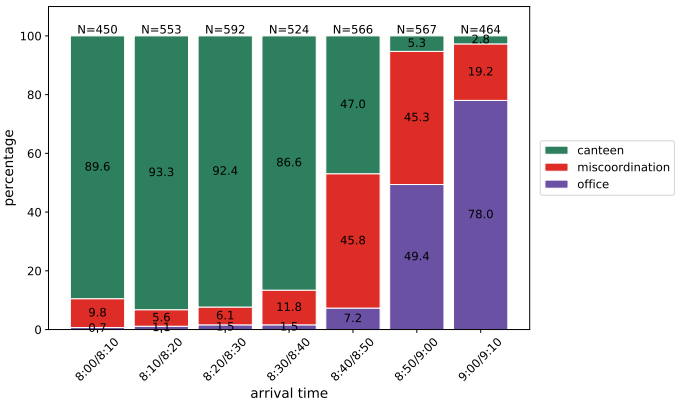

TARK (DTU1+DTU2)

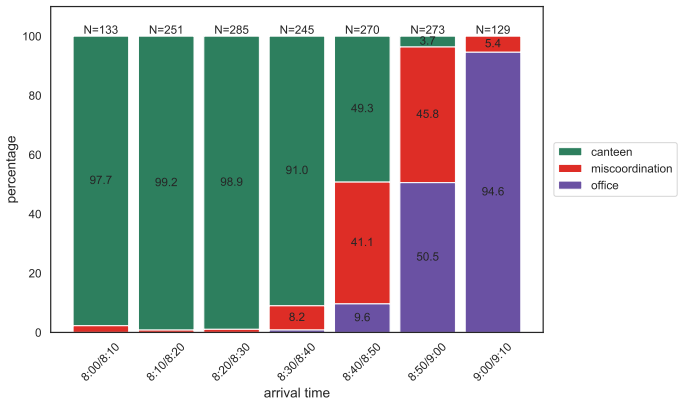

Left: MTurk blue vs DTU orange. Right: DTU1 vs DTU2.

Fig 3: coordination by arrival pair (keep)

arXiv (MTurk+DTU)

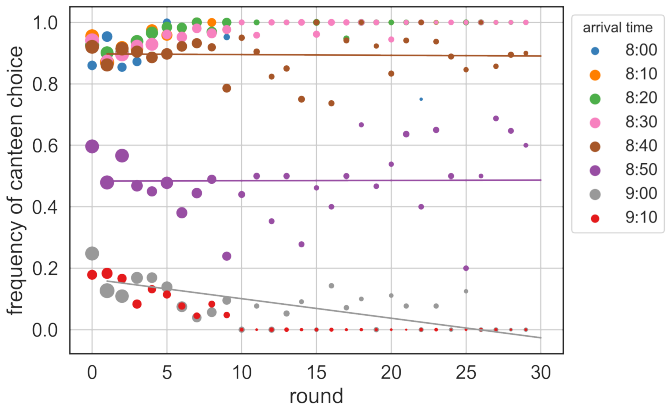

TARK (DTU1+DTU2)

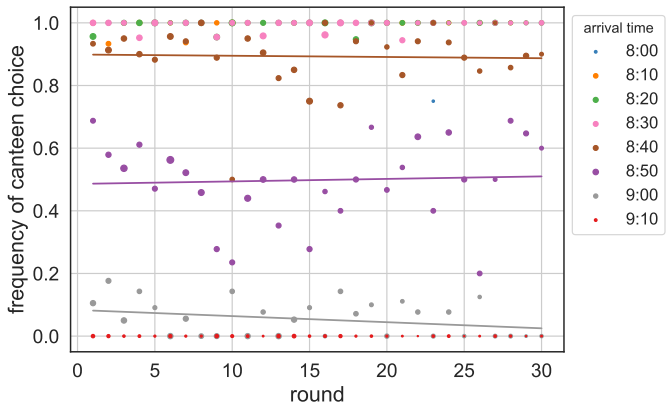

Miscoordination 41% at 8:40/8:50, 46% at 8:50/9:00. Early pairs now 1–2% (MTurk had 10–15%).

Fig 4: by round (appendix)

arXiv (MTurk+DTU)

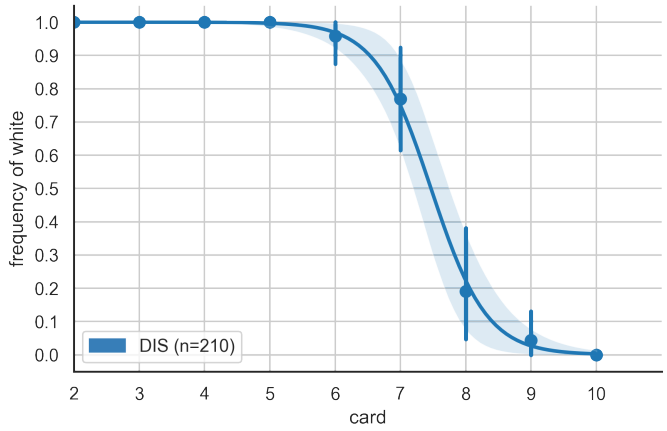

TARK (DTU1+DTU2)

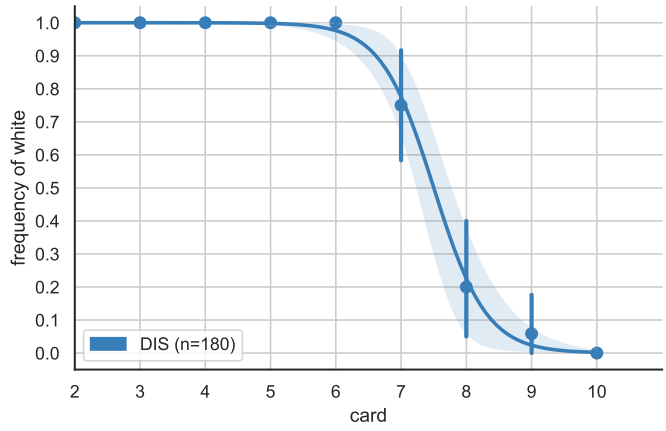

No convergence: WLS slopes $|b| \leq 0.002$ per round.

Fig 5: DIS (absorbed into merged Fig 1)

arXiv (MTurk+DTU)

TARK (DTU1+DTU2)

TARK: n=180 (author-played table removed, ERRATA 13); arXiv figure n=210.

Fig 6: knowledge diagram (keep, move to §2)

arXiv inset (fitted on DTU2 only, ERRATA 12):

TARK inset (DTU1+DTU2, n=3172), in the diagram:

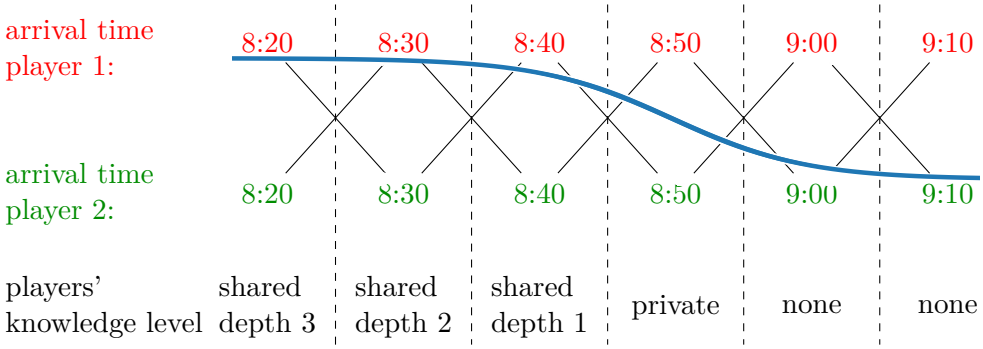

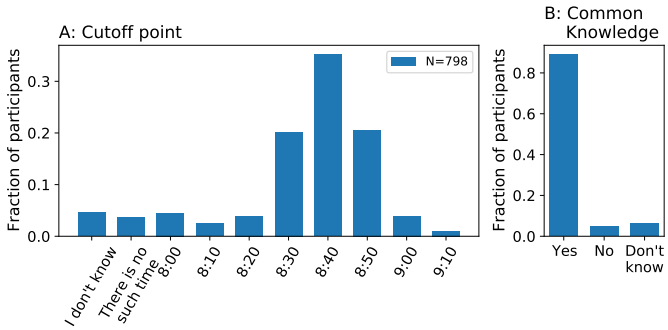

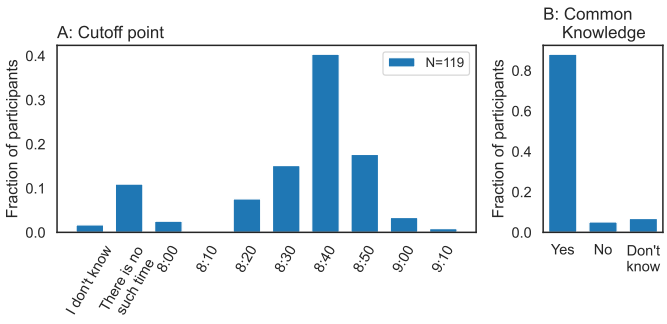

Fig 7: post-game answers (keep)

arXiv (MTurk+DTU)

TARK (DTU1+DTU2)

"No such time": 10.9% (was $< 4\%$). Safe cut-off 8:30–8:50: 73%. CK at 8:10 yes: 88%.
